DETAILED ACTION

This office action is in response to amendment filed February 11/2009.

Claim Objections

Claim 5 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim 5 contains "intended use" functional language. Intended use functional language in a claim does not carry patentable weight. If the intent is to claim the functional language applicant is advised to incorporate the functional language in to the claim.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 5 recites the limitation "the automotive sector" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the prior art of the record fails to teach:

As per claims 1 and 4, wherein a physical access address of the physical memory comprises least significant bits from a logical address of a message-object memory and least significant bits from a logical byte address within the message-object memory.

As per claim 12, wherein the number of address bits of a logical address of a message-object memory and the number of address bits of a logical byte address within the message-object memory are determined by the maximum upper limit of an address space of the message memory.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
